WHO WE ARE

A UAE-based energy trading house with a global outlook

Headquartered at the heart of the Gulf's storage, blending and export infrastructure, Sunara Energy bridges Gulf refiners and producers with growing industrial demand in Africa, South Asia and the wider Middle East.

We are a physical trader, not a broker. We take title to the cargo, manage the voyage and deliver on time with accurate documentation — that is what makes counterparties come back. Sunara Energy FZE was established in the United Arab Emirates by a team with deep experience in physical commodity trading, shipping and operations, to combine commercial agility with disciplined execution.

20+	3	24/7	100%

Our mission

To deliver energy and petrochemical products reliably, transparently and competitively to the industries that build growing economies — while meeting the highest standards of compliance and counterparty care.

Our vision

To be the trading partner of choice between Gulf supply and emerging-market demand — and a credible participant in the region's transition to lower-carbon energy.

The name says it all

Sun for the energy that powers the region, **-ara** for the arc of trade that connects it — reflected in the sun, the wave and the green shoot of our logo. A Gulf company built to move energy to the markets that need it most.

OUR VALUES

What we hold ourselves to

Four principles behind every offer we make and every cargo we ship.

Integrity

We say what we will do and do what we say — on price, quality and timing.

Compliance

KYC, sanctions screening and AML checks on every counterparty, every time. No exceptions.

Partnership

We build relationships measured in years and repeat cargoes, not single trades.

Excellence

Precision in documentation, operations and risk management.

WHY COUNTERPARTIES WORK WITH US

Speed

Indications within hours, firm offers within a day.

Reach

Starting with selected pilot markets across MEA & Asia.

Reliability

On-spec cargoes, on time, with complete shipping documents.

Right-sized parcels

From 2,000 MT coastal parcels to 40,000 MT liftings — the sizes our markets actually need.

Storage at hand

Office, storage partners and loading berths minutes apart in Hamriyah and Fujairah.

One accountable desk

Trading and operations sit together; one team answers for the cargo from enquiry to discharge.

Our promise

Every enquiry gets a straight answer, every cargo gets an independent inspection, and every document is checked before the vessel sails. That is how we earn the next cargo — and the one after it.

WHAT WE TRADE

Our products

Sourced from Gulf, Indian and Asian refiners and producers. Delivered from Hamriyah, Fujairah and Jebel Ali or direct to your port, with independent inspection on every cargo.

Gasoil / Diesel

Diesel for transport fleets, power generation, mining, agriculture and industry.

Polymers

Plastic raw materials for packaging, pipes, films, sacks and moulded goods.

Gasoline

Motor fuel for oil marketing companies, distributors and retail networks.

Fuel Oil

Heavy fuel for power stations, industrial boilers, cement plants and ships.

Bitumen

Road-building and waterproofing material for contractors and asphalt plants.

Base Oils

The base for engine, hydraulic and industrial lubricants and greases.

LPG

Cooking, heating, autogas and industrial gas in bulk and small parcels.

Petrochemicals

Solvents, glycols and aromatics for paints, textiles, pharma and manufacturing.

DELIVERY

- FOB Hamriyah / Fujairah / Jebel Ali
- CFR / CIF to destination port
- Bulk tankers & coastal vessels
- Containers, ISO tanks & flexitanks
- Road tankers for regional supply
- Full product specifications on request

HOW WE WORK

From enquiry to discharge, one accountable desk

Trading and operations sit together, so every cargo is priced and shipped by people who talk to each other daily.

01

Strategic sourcing

Term and spot supply from Gulf, Indian and Far East refiners and producers.

02

Risk management

Price, quality and counterparty risk managed on every cargo.

03

Logistics excellence

Chartering, independent inspection, storage and last-mile delivery.

04

Reliable delivery

On-spec, on-time cargoes with complete documents at discharge.

Logistics base

Two coasts, one country. **Hamriyah**, inside the Gulf, serves small parcels for the northern Gulf and Pakistan; **Fujairah**, outside the Strait of Hormuz, handles larger East African and Indian Ocean liftings. Containers and polymers move through **Jebel Ali**. Trucking between the coasts takes hours, not days.

What a counterparty can expect

A firm offer, an inspection slot and a loading window in the same conversation. Independent inspection at load and discharge. Documents checked against the contract before the vessel sails. A desk that answers the phone around the clock while a cargo is live.

MARKETS

Gulf & Middle East

UAE, GCC, Iraq, Yemen — spot and term supply from Hamriyah and Fujairah.

Africa

Kenya, Tanzania, Mozambique, Uganda, Egypt, Sudan, Nigeria — fuels, LPG, bitumen and polymers.

South & South-East Asia

Pakistan, India, Sri Lanka, Bangladesh, Maldives, Vietnam — fuels, base oils, petrochemicals and resins.

INDUSTRIES SERVED

Fuelling the sectors that build economies

Our customers are refiners, distributors, utilities, contractors and manufacturers — the businesses that keep power on, goods moving and construction going.

- ⚡ Power generation
- 🚚 Transport & fleets
- ⚓ Marine & bunkering
- 🏗 Construction & roads
- 📦 Packaging & plastics
- ⚙ Manufacturing
- ⛏ Mining
- 🌾 Agriculture
- 🎨 Paints & coatings
- 🔥 LPG distribution
- ✈ Aviation fuel farms
- ☀ Solar & renewables

Who buys from us

Oil marketing companies and fuel distributors · Independent power producers and utilities · Cement, mining and construction groups · Shipping and bunkering companies · Plastics converters and packaging manufacturers · Lubricant blenders · Paint, adhesive and chemical formulators · LPG cylinder and autogas distributors.

How they buy

Spot cargoes when a market is short, and term contracts when a customer wants certainty of supply. Full cargoes for the large importers; 2,000 – 10,000 MT parcels, containers and ISO tanks for the growing buyers most traders overlook.

Energy transition

The Gulf is investing in solar, hydrogen and lower-carbon fuels at pace. For a product trader that is not a threat to wait out but a change in the product slate to be traded — and we intend to be a credible participant in it.

GOVERNANCE & COMPLIANCE

Trade you can rely on

We run our compliance programme to the standard expected of a regulated commodity trader.

1 Counterparty due diligence
Full KYC on suppliers, buyers, agents and vessels before first trade.

2 Sanctions & AML screening
OFAC, EU, UN and UAE lists screened at onboarding and at every shipment.

3 Vessel vetting
Age, flag, ownership, AIS history and P&I cover checked before nomination.

4 Documentary discipline
Shipping documents checked against the contract before every cargo.

5 Quality & quantity
Independent inspection (SGS, Intertek, Bureau Veritas) at load and discharge.

6 Licensing
Hamriyah Free Zone Authority licence for trading in petroleum and petrochemical products.
